

StormGuard Series "10/11" Control Consoles

- Stainless steel construction utilizing higher quality control processes. This improved process results in improved durability and longer console life
- Compatible with the AS2 or MS2 StormGuard spreader controls
- Modular design allows for multiple control configurations—either joystick control or rocker switch control for valve operation
- Allows up to six accessory switches and indicators for add-on truck lights and accessories
- Console construction designed for integration into saddlebag or stand alone for floor or pedestal mount
- Modular design allows for easy addition of spreader control to existing units

Model SG 11

The new StormGuard line of control consoles have been re-engineered for today's challenges in the Snow and Ice Industry. In keeping with our traditional console designs that have serviced the market for many years, we have added more variety and flexibility to allow you to better customize your system to fit your needs.

Our improved design allows for the integration of the newest technology along with the products that have serviced you for years. The New SG10/11 series consoles are specifically designed for the medium duty truck market. A compact yet powerful package to handle hoist, plow and spreader functions all in a simple in-cab design that meets today's smaller truck equipment needs. The control's modular front bay allows many different combinations of control, as well as room for expansion for future equipment additions.

Our unique and new approach to a proven system shows that we are committed to improvements at all levels of our business. At StormGuard, the revolution continues....

Talk to one of our representatives today about the new StormGuard "SG10/11" series controls for the medium duty and 1-ton truck market.

"We Know Snow"

Component Technology is a pioneer in snow and ice removal. We definitely have the experience to do the job. From the operator to the fleet manager we understand what you need. That's why the entire StormGuard product line, top to bottom, is the best available when you compare safety, reliability, durability, and ease of maintenance. Our engineering staff consistently proves that it is the most innovative in the industry. This makes us the best at bringing your ideas to reality. We can help you design systems and controls that will do your job right and do it well. We are here to serve you and believe that our total commitment to your success is the key to our mutual success.
