

StormGuard Series "20/21" Control Consoles

- Stainless steel construction utilizing higher quality control processes. These improvements result in increased durability and longer console life
- Compatible with all StormGuard spreader controls
- Variety of valve control options including electronic on/off, proportional and cable & air control
- Electronic Joystick options include single axis, dual axis and multifunction capabilities
- Modular switch bay design allows for flexibility in number of switches, indicators and location
- Compatible with CircuitGuard power distribution center, as well as our stand alone power distribution systems
- Available with our new TouchGuard switch control system
- High and low stick design for multiple cab configurations

The new StormGuard line of control consoles have been re-engineered for today's challenges in the Snow & Ice Industry. In keeping with our traditional console designs that have serviced the market for many years, we have added more variety and flexibility to allow you to better customize your system to fit your needs.

Our improved design allows for the integration of the newest technology along with the products that have serviced you for years. The SG series consoles handle a variety of hydraulic functions and control types and are expandable as your equipment needs grow.

Our unique and new approach to a proven system shows that we are committed to improvements at all levels of our business. At StormGuard, the revolution continues....

Contact your representative today about the new StormGuard "SG" series controls.

"We Know Snow"

Component Technology is a pioneer in snow and ice removal. We definitely have the experience to do the job. From the operator to the fleet manager we understand what you need. That's why the entire StormGuard product line, top to bottom, is the best available when you compare safety, reliability, durability, and ease of maintenance. Our engineering staff consistently proves that it is the most innovative in the industry. This makes us the best at bringing your ideas to reality. We can help you design systems and controls that will do your job right and do it well. We are here to serve you and believe that our total commitment to your success is the key to our mutual success.

Additional Features:
