

FT201 Electronic Spreader Control Test System

- 4 Channel PWM tester. Auger, spinner and two liquid outputs
- Designed for testing our complete line of spreader controls. The GL400, AS2, DS2 and the MS2
- 4 Analog outputs (simulate sensor inputs)
- Skip control switch activates GL400 skip feature
- Spot control switch activates GL400 spot feature
- 2-speed Axle control switch activates GL400 2-speed axle feature
- Float switch to simulate low liquid level
- Calibrate switch for entering GL400 setup and calibration
- MPH output to simulate vehicle speed
- Selector switch to simulate load on outputs
- Switch for internal or external load simulation
- Amp meter to view output current

The FT201 Electronic Spreader Control Tester is a must for any fleet using electronic spreader controls. The FT201 simulates the entire truck hydraulic and sensor system for the spreader control allowing your technicians to quickly solve problems. Using the FT201 your maintenance crew will easily eliminate control problems and get to the cause much faster, making their job easier.

The FT201 is a great training tool. Students can clearly see the control operate in a classroom environment giving them the hands on experience they need. The test unit can also be used to do bench setups and calibrations.

Another quality product from StormGuard, giving you the tools you need to make your job easier and your maintenance crew more effective.

Contact your sales representative today and ask about the new FT201 Electronic Spreader Control Test System.
